

Terumo[®] Syringes

Three part syringes

Controlled aspiration and injection for medical staff

- Double-contact gasket for an airtight seal
- Advanced siliconisation for optimal plunger movement
- Firm and definite end-stop
- Clear scale markings to enable precise dosage
- Highly transparent barrel for visualisation
- Ergonomic finger grips
- Latex and PVC-free

 **TERUMO[®]**

We keep life flowing

A smooth and perfectly controlled injection is possible due to the double-contact gasket to ensure an airtight seal. It makes a smooth and precise plunger action possible.

The ergonomically designed finger grips and push-button allow a perfectly controlled and stable injection.

The highly transparent barrel allows for easy recognition of air bubbles and turbid medication. The bold scale markings on the barrel assure the precise measurement of the medication dose.

The firm and definite end stop prevents accidental separation or spillages, and avoids exposure to hazardous or infectious fluids.

We equally offer an OPAQUE syringe within our range that can be used to administer photosensitive drugs. The syringe is latex free, opaque, 50 ml, with a luer lock system and can be used on syringe pumps.

The latex free gasket designed for safety uses a highly inert thermoplastic elastomer material. It reduces the risk of leaking or medication interaction. This unique material equally allows the plunger to move more smoothly.

Our sterile, individual blister packs keep every syringe in a sterile condition until it will be used. It also provides tamper-proof evidence and is latex free.

Syringes without needle

Product Code	Description		Packaging	
	Size (ml)	Type	Unit box	Shipping carton
BS-01T	1	Luer Slip tip	100	1800
