

Quality time for better care

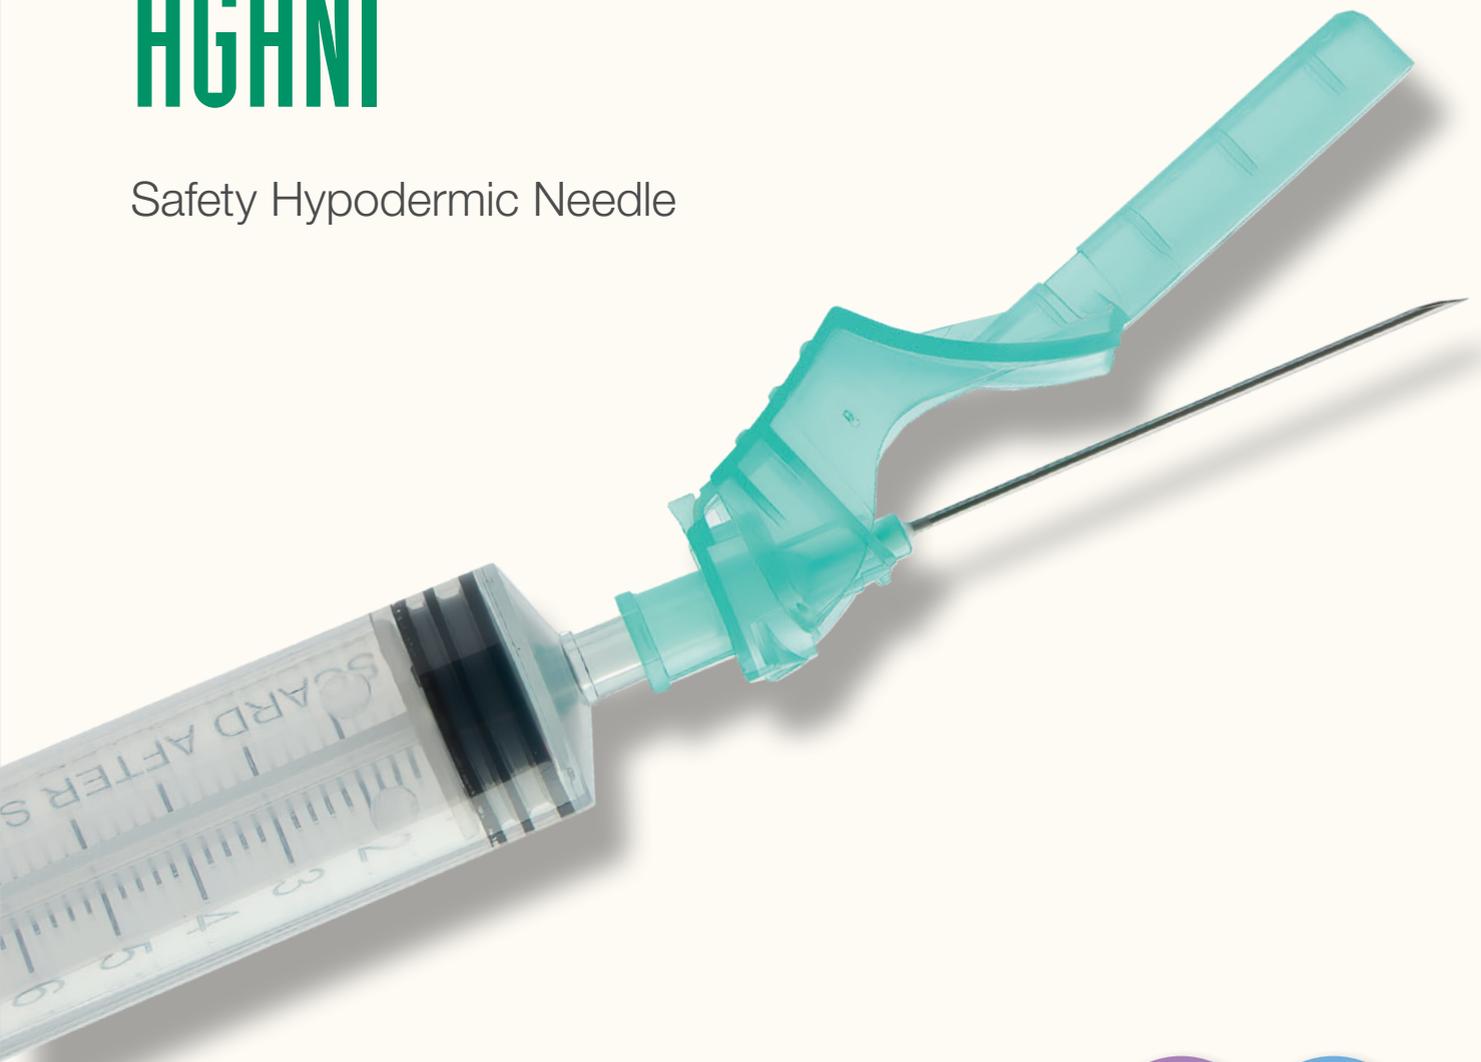

"Quality time for better care" is the brand promise of Terumo Medical Care Solutions.

HOSPITAL CARE

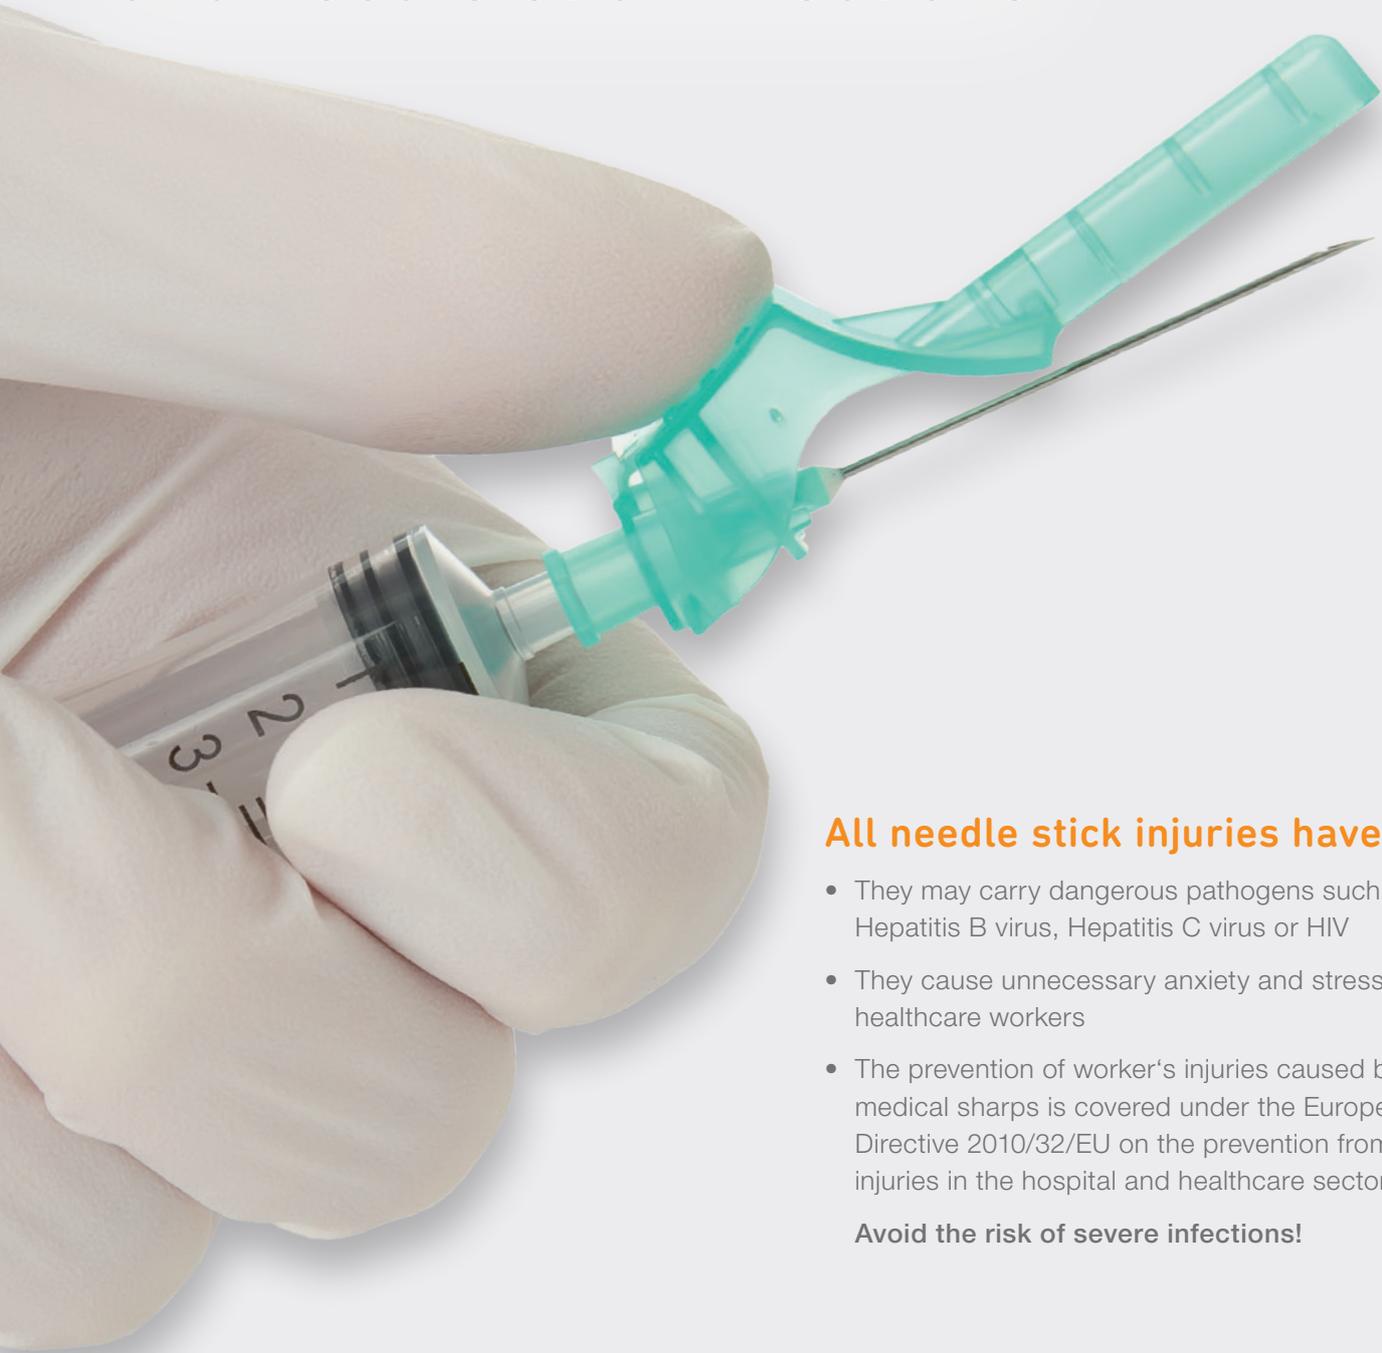

AGANI™

Safety Hypodermic Needle

Avoid a needle stick  
with a simple click

# Helping to prevent healthcare worker injuries and needle stick infections

## All needle stick injuries have risk

- They may carry dangerous pathogens such as Hepatitis B virus, Hepatitis C virus or HIV
- They cause unnecessary anxiety and stress to healthcare workers
- The prevention of worker's injuries caused by medical sharps is covered under the European Directive 2010/32/EU on the prevention from sharps injuries in the hospital and healthcare sector<sup>1</sup>

**Avoid the risk of severe infections!**

**Injection & Access**

**Delivering  
sharps protection**

# Secure and easy handling protects healthcare workers at risk

The use of safety devices has been proven beneficial in the prevention of sharps injuries in the hospital and healthcare sector.<sup>1,2</sup>

**Versatility**  
Can be fitted with standard Luer Slip or Luer Lock syringes.

**ISO 6009 colour-coded hub**  
easy identification of the required size by the ISO colorcodes.

**Secure safety activation** «CLICK»  
Audible feedback and clear sheath window ensure confirmation of secure locking of the needle in the shield.

**One-hand activation**  
Safety mechanism allows sheath activation with one hand.

**Smooth and easy puncture increases application comfort**

Agani™ Safety Hypodermic needles have a sharp lancet tip and an outside layer of silicone lubricant.

**The sharp point**

- Facilitates the penetration of the skin
- Helps to minimize the trauma

**The silicone coating**

- Provides good gliding properties
- Allows a smooth insertion

Agani™ Safety Hypodermic needles are designed to enable high levels of safety, care and comfort in the injection or aspiration of drugs or blood. A large portfolio makes them suitable for a wide range of medical applications.

# Choose safety throughout the range

## Agani™ Safety Hypodermic Needles

Single use, latex-free, EO sterilized hypodermic needles, made from plastic materials and stainless steel.

Length 13 mm  
Colour Yellow

For further ordering information, please refer to the Agani™ Safety Hypodermic needles product information card.

Does not contain components made of PVC or natural rubber latex.

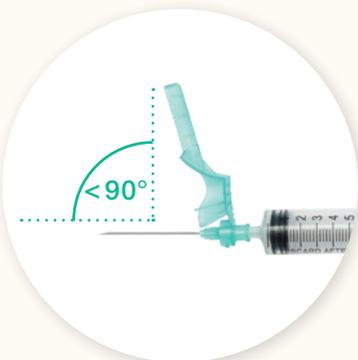

# Managing the risk with Agani™ Safety Hypodermic Needles

The more injections - the higher the risk of sharps injuries  
Increasing the need for safety needles

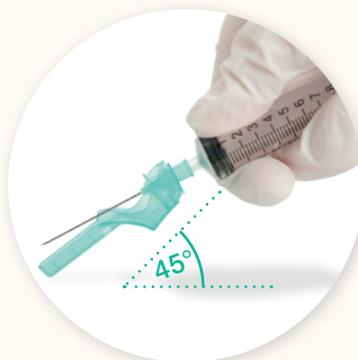

Agani™ Safety Hypodermic needles deliver a solution to prevent needle stick injuries. After withdrawing the needle, the attached safety shield can be activated to cover the needle and minimize the risk of an accidental needle stick.

## Activation of the safety mechanism

Use one hand technique and push the tab forward with your finger or thumb so that the sheath is  $< 90^\circ$  from the needle. Keep your finger or thumb behind the tab at all times.

Position the sheath approx.  $45^\circ$  to a flat surface.

Press down with a firm, quick motion until you hear a distinct audible click.

# Dedicated to making things better

Sharps protection for healthcare workers provides an important tool in healthcare setting.

Our goal is to create simple, effective solutions to support all those giving their best to treat patients.

Contributing to Society  
through Healthcare
